THREE DAY`S WORKSHOP ON

WORLD BEST MAINTENANCE STRATEGIES, PRACTICES, EFFECTIVE PREDICTIVE, PREVENTIVE AND CONDITION BASED MAINTENANCE TECHNIQUES- PROACTIVE MAINTENANCE APPROACH

14-16 NOV AND 19-21 DEC 2019 AT MUMBAI

Description:

A practical “**How-to-Do-it Guide**” for implementing, measuring results and successfully applying today’ s best practices for Preventive (PM) and Predictive Maintenance (PDM), covering essential maintenance operations that range from equipment selection and maintenance interval planning to condition-based monitoring techniques and lifecycle costing.

WHY ATTEND THIS WORKSHOP?

Maintenance’ s key objective is to increase uptime without over-doing maintenance and the challenge lies in how to determine the right mix of Preventive Maintenance and Predictive Maintenance. Many organizations are also facing key decisions on whether to repair or to replace aging physical assets. By utilizing life cycle costing and value engineering concepts, companies can fully capitalize on existing assets and save on unnecessary expenses.

This 3-day intensive Master-class “**World Best strategies and maintenance practices, Effective Preventive, Predictive & Condition-Based Maintenance**” is a practical “How-to-Do-it Guide” for implementing, measuring results and successfully applying today’ s best practices for Preventive (PM) and Predictive Maintenance (PdM), covering essential maintenance operations that range from equipment selection and maintenance interval planning to condition- based monitoring techniques and lifecycle costing. In addition, delegates will be introduced to strategies that will enhance and improve PM & PdM – Reliability-Centred Maintenance (RCM), Total Productive Maintenance (TPM), and Risk-Based Maintenance (RBM).

Course Objective

- Assess your present Preventive (PM) & Predictive Maintenance (PdM) needs and improve current performance
- Apply Reliability-Centered Maintenance (RCM) & Total Productive Maintenance (TPM) principles to your maintenance strategy for PM and PdM.
- Define your critical asset repair or replacement problems via life cycle costing.
